

ATLAS POWDER COMPANY

WILMINGTON 99, DELAWARE

November 29, 1946

Yale University
Osborn Botanical Laboratory
New Haven, Connecticut

Attn: Mr. Joshua Lederberg

Dear Mr. Lederberg:

In accordance with your letter of November 18th, 1946, we are pleased to send you a 4-ounce sample of TWEEN 80 from a lot that has been evaluated by Dr. R. J. Dubos as being satisfactory for use in his proposed tubercle bacillus culture medium.

In case you may be interested in other members of the SPAN and TWEEN series of Atlas non-ionic surface active agents, we are enclosing a booklet describing them.

We shall be glad to send you samples of any others that you may also wish to study.

Very sincerely yours,

ATLAS POWDER COMPANY

C. D. Pratt
